

# Universal Control Panels

Providing a streamlined user interface, single panel monitoring and control of multiple devices, the USP3 panels are ideal for when users must interact quickly between active sources and when multiple switch commands must be activated simultaneously.

Featuring programmer-free webpage setup, the USP3 enables users to create task-specific control interfaces for the most complex scenarios. Users can store multiple configurations and replicate them to other local or remote USP systems.

- Show users only the device or system information, status and tallies they need in order to react quickly and accurately to any situation.
- Give users control over only those functions they need to simplify operations and reduce errors.
- Monitor and Control multiple devices from a single panel.
- Easily create multi-action commands (macros) with a single push-button command.

Trigger	Action
Turn GPI on / off	GPO On / Off
Serial Command	Serial Command Out
Ethernet Command	Ethernet Command Out
SNMP Trap	SNMP Set
SNMP Get	HTTP Set
HTTP Get	DTMF Send (AIB4)
DTMF Recieve (AIB4)	Timer Start
Timer End	Start Sequence (Salvo)
Push a button	Set Button Text
	Set Button Colour

## The USP3 Range

### USP3-16

- LCD Pushbuttons: 8 or 16
- GPIs: 16 opto-isolated inputs
- GPOs: 16 isolated relay contact closures
- Serial: RS422 / RS232
- Ethernet: 100BaseT Full Duplex
- Redundant Power Supplies (optional)

### USP3-8D

- LCD Pushbuttons: 8
- GPIs: 8 opto-isolated inputs
- GPOs: 8 isolated relay contact closures
- Serial: RS422 / RS232
- Ethernet: 100BaseT Full Duplex

### USP3-Shotbox

- LCD Pushbuttons: 30
- Pushbuttons: 16
- GPIs: 8 opto-isolated inputs
- GPOs: 8 isolated relay contact closures
- Serial: RS422 / RS232
- Ethernet: 100BaseT Full Duplex
